SUPRAJA'S FIGHT AGAINST CERVICAL CANCER

Supraja a 37-year-old mother of three, was diagnosed with cervical cancer at an advanced stage. She had no means to afford proper treatment, and with every passing day, her hope dwindled. Her husband had abandoned her, unable to bear the weight of her illness. Weak and in pain, she struggled to care for her children.

Through True Joy Global Foundation, supraja received medical support, counseling, and financial aid for treatment. Her chemotherapy sessions were covered, and her children were provided for. Today, though still in recovery, supraja holds on to faith and the love that saved her. She prays for continued support as she fights for her life and her children's future.
